

**JWC Environmental LLC (Booth 4516)**

[www.jwce.com](http://www.jwce.com)

With over 40 years' experience, JWC Environmental provides advanced pretreatment equipment for municipal and industrial wastewater applications. Our product range includes Muffin Monster and Channel Monster grinders as well as a complete range of screening and dewatering solutions.

**KLa Systems Inc.**

[www.klasystems.com](http://www.klasystems.com)

Since 2001, KLa Systems has been supplying custom engineered mixing and aeration technologies to industry and municipalities worldwide. Our jet aeration, jet mixing, and Slot Injector systems are ideally suited for both conventional and advanced biological treatment processes.

**Komline-Sanderson (Booth 2229)**

[www.komline.com](http://www.komline.com)

Pump. Thicken. Dewater. Dry. Since 1946, Komline-Sanderson has provided the highest quality equipment for drying, wastewater treatment, sludge processing, and air pollution control applications. Products include biosolids drying systems, belt filter presses, gravity belt thickeners, and plunger pumps.

**KSB Inc. (Booth 4351)**

[www.ksbusa.com](http://www.ksbusa.com)

KSB, a subsidiary of KSB AG, supplies quality water and wastewater pumps and mixers, i.e. submersible non-clog sewage, mixed flow, conventional dry pit sewage pumps, and submersible mixers. KSB has an established network of sales and service locations to meet customers' needs.

**LF Manufacturing Inc. (Booth 1662)**

[www.lfm-frp.com](http://www.lfm-frp.com)

LF Manufacturing has been building quality fiberglass products for the municipal, industrial, oilfield, and chemical industries since 1976. With six manufacturing facilities in the United States, LFM can serve our customers cost effectively.

**Mueller Company (Booth 2417)**

[www.muellercompany.com](http://www.muellercompany.com)

Since 1857, Mueller Co. has produced innovative water distribution products of superior quality. We are North America's largest full-line supplier of potable water distribution products. Our products are used throughout the water system, from source to customer.

**OCV Control Valves (Booth 6246)**

[www.controlvalves.com](http://www.controlvalves.com)

OCV Control Valves manufactures valves for water management and water conservation control, sizes 1-1/4"-24". Common applications: reducing, pump control, electronic, level control, and relief/surge. Certifications include ISO 9001, NSF 372, and ARRA/AIS compliant. Visit us online for ValveMaster, our sizing software.

**Parkson Corporation (Booth 1134)**

[www.parkson.com](http://www.parkson.com)

Founded in 1960, Parkson supplies equipment and solutions for potable water, process water, and industrial and municipal wastewater applications. We offer a wide range of technologies, including screenings and headworks, separation equipment, biological treatment, biosolids management, and more.

**Pentair (Booth 4041)**

[www.pentair.com](http://www.pentair.com)

Since 1916, Pentair Fairbanks Nijhuis continues to manufacture distinctive products, serving multiple markets including water supply, sewage handling, flood control, power generation, desalination, agricultural irrigation, and fire protection. We also deliver professional services including installation, maintenance, repair, and training.

**Pinnacle Ozone Solutions LLC**

[www.pinnacleozone.com](http://www.pinnacleozone.com)

Pinnacle Ozone Solutions offers the world's most advanced modular ozone generator technology. Our compact and integrated ozone process systems provide decades of silent and virtually service-free operation and the lowest total ownership cost available.

**Revere Control Systems**

[www.reverecontrol.com](http://www.reverecontrol.com)

Founded in 1980 and based in Birmingham, Alabama, Revere Control Systems is an industrial automation and control systems integrator specializing in turn-key or scalable engineering, design-build project delivery, process automation, industrial network technology, electrical (arc flash) safety, commissioning, and after-market services.

**Schreiber LLC (Booth 5939)**

[www.schreiberwater.com](http://www.schreiberwater.com)

Since 1979, Schreiber has provided complete wastewater treatment solutions, offering tube-mounted and open flight screw pumps, screens, grit and grease removal, BNR/ENR, peripheral drive clarifiers, and filtration, as well as technological innovations such as the Fuzzy Filter, our compressible media system, and our activated sludge solution, the Continuously Sequencing Reactor.

**Smith & Loveless Inc. (Booth 5539)**

[www.smithandloveless.com](http://www.smithandloveless.com)

Smith & Loveless manufactures pre-engineered pumping and treatment systems, including lift stations, grit removal systems for municipal headworks and industrial process streams, and a complete range of wastewater treatment systems, including membrane bioreactors, fixed-film, and extended aeration plants.

**SUEZ (Booth 4229)**

[www.suez-na.com](http://www.suez-na.com)

As an industrial services and solutions company specializing in securing and recovering water resources, SUEZ provides its customers (local municipalities, industry, and consumers) with concrete solutions, technologies, and services to address today's resource management challenges.

**Sulzer Pumps/ABS USA (Booth 2215)**

[www.sulzer.com](http://www.sulzer.com)

Sulzer helps meet the global demand for clean water. Our solutions—which include pumps and related equipment (such as lifters, mixers, aerators, compressors, control and monitoring equipment, as well as services)—are essential for water transport and use, as well as desalination and wastewater treatment.

**Val-Matic Valve & Manufacturing Corporation (Booth 5327)**

[www.valmatic.com](http://www.valmatic.com)

Val-Matic Valve & Manufacturing Corporation is a leading manufacturer of air valves, check valves, and quarter turn valves for the water/wastewater, industrial, commercial building construction, and plumbing industries. Val-Matic provides the highest quality valves manufactured under a certified ISO 9001 quality system.

**Water Remediation Technology LLC (WRT)**

[www.wrtnet.com](http://www.wrtnet.com)

WRT provides efficient and environmentally safe treatment solutions for the removal of radium, uranium, arsenic, ammonia, and other select contaminants from water sources. WRT also provides radioactive material licensing and handling, long-term service agreements, and media exchange and replacement services.

**Xylem Inc. (Booth 2529)**

[www.xyleminc.com](http://www.xyleminc.com)

Xylem is a leading water technology company with operations in 150+ countries. Our five growth centers—transport, treatment, dewatering, analytics, and applied water systems—share applications expertise to cover every stage of the water cycle.

**VISIT us at Booth #1207**

*The voice of the technology  
provider in the water and  
wastewater industry since 1908*

**FULL MEMBER  
DIRECTORY**

**[www.wwema.org](http://www.wwema.org)**

**Aeration Industries International (Booth 1719)**

[www.aireo2.com](http://www.aireo2.com)

For 40+ years, Aeration Industries has supplied AIRE-O2 surface aeration equipment and biological process systems to the municipal and industrial wastewater markets. Our solutions are engineered for biological applications including lagoons, activated sludge systems, digesters, and EQ tanks.

**Aerzen USA (Booth 7339)**

[www.aerzenusa.com](http://www.aerzenusa.com)

Aerzen USA provides solutions for producing low-pressure air or gas, including positive displacement blowers, screw compressors (Hybrid blower), and centrifugal blowers (high-speed turbos), as well as integrated starters and VFDs. New in 2015, we have a safe, reliable solution for biogas applications for pressures up to 45 psig and flows to 1500 cfm.

**Aqua-Aerobic Systems Inc. (Booth 829)**

[www.aqua-aerobic.com](http://www.aqua-aerobic.com)

Aqua-Aerobic Systems is an applied engineering company featuring adaptive water management solutions including: aeration and mixing, biological processes, filtration, disinfection, membranes, process controls, and aftermarket products and services. Since 1969, we have served global customers in both the municipal and industrial water/wastewater markets.

**Aquarius Technologies, Inc. (Booth 713)**

[www.aquariustechnologies.com](http://www.aquariustechnologies.com)

Aquarius Technologies provides high-quality, cost-effective water and wastewater treatment solutions by focusing on customers’ needs and building long-term partnerships. Our offerings include diffused aeration systems, fixed bio-film systems, and advanced biological treatment systems.

**Aquionics (Booth 5313)**

[www.aquionics.com](http://www.aquionics.com)

Aquionics’ ultraviolet systems provide non-chemical disinfection technology that eliminates the use of hazardous chlorine. This technology, coupled with our application expertise, product design, and customer support, enables us to provide municipalities with a safe, reliable water treatment system.

**Badger Meter (Booth 4528)**

[www.badgermeter.com](http://www.badgermeter.com)

Badger Meter manufactures products and solutions to measure and control whatever moves through a pipe—including liquids and gases. Customers rely on our products to deliver accurate and dependable flow data and control to optimize their operations.

**Calgon Carbon Corporation (Booth 6539)**

[www.calgoncarbon.com](http://www.calgoncarbon.com)

As a leader in the activated carbon industry and with ultraviolet light disinfection and oxidation expertise, Calgon Carbon Corporation has pioneered cutting-edge purification systems for drinking water, wastewater, odor control, pollution abatement, and a variety of industrial and commercial manufacturing processes.

**De Nora Water Technologies (Booth 5127)**

[www.denora.com](http://www.denora.com)

De Nora Water Technologies represents more than 50 years’ experience in water treatment through brands such as Capital Controls, TETRA, ClorTec, SeaClor, Bayoxide, Omnipure, and BALPURE combined with the product development, filtration, and disinfection expertise of a global leader. Our products, systems, and technologies are used across the municipal, oil/gas, power generation, and marine sectors.

**Duperon Corporation (Booth 1013)**

[www.duperon.com](http://www.duperon.com)

For over 30 years, Duperon Corporation has partnered with municipalities, contractors, and engineers to provide simple screening solutions with attention to detail that considers the entire system. Our commitment to excellence fulfills our promise: “You’ll like working with us.”

**E&I Corporation**

[www.eandicorp.com](http://www.eandicorp.com)

The E & I Corporation has been providing treatment equipment to clients in the municipal and industrial water and wastewater markets for over 40 years. Our key products include water and wastewater screens, washer/compactors, grit collectors, rectangular collectors, and flocculators.

**Electrosteel USA**

[www.electrosteelusa.com](http://www.electrosteelusa.com)

As the first importer of ductile iron pipe in North America, Electrosteel USA has quickly been recognized as an innovation leader. From protective linings to advanced coatings, we offer utilities DIP and DI fittings with the latest performance-enhancing technologies.

**Enviro-Care Company (Booth 4317)**

[www.enviro-care.com](http://www.enviro-care.com)

Enviro-Care, a WAMGROUP® company, is the exclusive sales and engineering partner in North America for a complete line of headworks, MBR pre-treatment and Septage-FOG-Sludge screening and solids/grit management equipment for the Municipal and Industrial markets. SPECO and SAVI divisions of the WAMGROUP® and FSM Frankenberger GmbH & Co. KG. are among Enviro-Care’s quality brands.

**Environment One Corporation (Booth 3516)**

[www.eone.com](http://www.eone.com)

Environment One Corporation is a worldwide manufacturer of complex metal parts and industrial products, and a manufacturer and provider of products and services for the disposal of residential sanitary waste and utility systems. E/One is the originator in the manufacture and deployment of grinder pumps for pressure sewer systems (aka E/One Sewer Systems).

**Evoqua Water Technologies (Booth 4839)**

[www.evoqua.com](http://www.evoqua.com)

Evoqua Water Technologies delivers high performance technologies for primary and secondary clarification, ballasted clarification, biological treatment, ultrafiltration, tertiary treatment, anaerobic digestion, odor control, and UV and chlorine disinfection. Brands include Envirex®, MEMCOR®, Wallace & Tiernan®, Jet Tech, DAVCO™, RJ Environmental, LYCO, Neptune Benson®, VAF Filtration Systems, JWI™, USFilter® and more.

**Flowserve Corporation**

[www.flowserve.com](http://www.flowserve.com)

Flowserve Corp. is one of the world’s leading providers of fluid motion and control products and services. Operating in 55+ countries, the company produces a wide variety of engineered and industrial pumps, seals, valves, and specialty equipment.

**Fortech, Inc.**

[www.fortech.us](http://www.fortech.us)

Fortech is a systems integrator/panel manufacturer/field startup support company. Our registered electrical engineering team designs sophisticated control and SCADA systems as a standard offering. Our panel shop has a full complement of UL certifications. The company has been in business 28 years.

**Gorman-Rupp Pumps (Booth 3429)**

[www.grpumps.com](http://www.grpumps.com)

Gorman-Rupp Pumps is a leading manufacturer of pumps and pumping systems for the municipal, water, wastewater, sewage, industrial, construction, and original equipment manufacturing markets. Established in 1933, Gorman-Rupp provides a quality, competitively priced product backed by superior customer service.

**Huber Technology Inc. (Booth 4029)**

[www.huber-technology.com](http://www.huber-technology.com)

As experts in liquid/solid separation technologies, Huber Technology offers virtually the complete chain of screening, grit, and sludge handling processes. Huber is an original source manufacturer specializing in stainless steel.

**Hydro International (Booth 1746 & 3329)**

[www.hydro-int.com](http://www.hydro-int.com)

Hydro International is a global company that provides advanced products, services, and expertise to help municipal and industrial customers to improve their water management processes, increase operational performance, and reduce environmental impact.

**Hydro-Dyne Engineering Inc. (Booth 1737)**

[www.hydro-dyne.com](http://www.hydro-dyne.com)

Hydro-Dyne Engineering Inc. is a leading manufacturer of exceptional quality screening and grit removal equipment for municipal and industrial water and wastewater facilities. Hydro-Dyne owns its own patents and performs all equipment design, fabrication, assembly, and testing in-house.

**INVENT Environmental Technologies Inc. (Booth 2409)**

[www.invent-et.com](http://www.invent-et.com)

INVENT develops, produces, and globally implements innovative technical components, systems, and processes for municipal and industrial water and wastewater treatment plants. Our product range encompasses innovative and energy efficient mixing and aeration technology, intelligent system solutions, engineering and consulting, as well as fluid dynamic simulation services.

**Ixom Watercare Inc. (Booth 7621)**

[www.ixom.com/our-business/water](http://www.ixom.com/our-business/water)

Formerly Orica Watercare, we are using our global presence, vast expertise, and technical services to expand beyond MEX and MICO. Ixom is uniquely qualified to address total water management for drinking water, wastewater, and stormwater using an integrated solutions approach.

**JCM Industries Inc.**

[www.jcmindustries.com](http://www.jcmindustries.com); [www.jcminustrialfittings.com](http://www.jcminustrialfittings.com)

JCM manufactures a full line of fittings to repair, connect, and branch all types and sizes of pipe. Fittings include repair clamps, service saddles, tapping and line-stop sleeves, and fabrications. Special applications, sizes, and pressures are our specialty.

**Jim Myers & Sons Inc. (JMS)**

[www.jmsequipment.com](http://www.jmsequipment.com)

JMS was founded in 1962 and has since become a nationally recognized manufacturer of water and wastewater treatment equipment and systems. Our equipment, designed and manufactured in Charlotte, North Carolina, includes water treatment flocculators, plate settlers, and sludge removal, wastewater material handling systems with conveyors and hoppers, and separation systems.
